Brief Summary

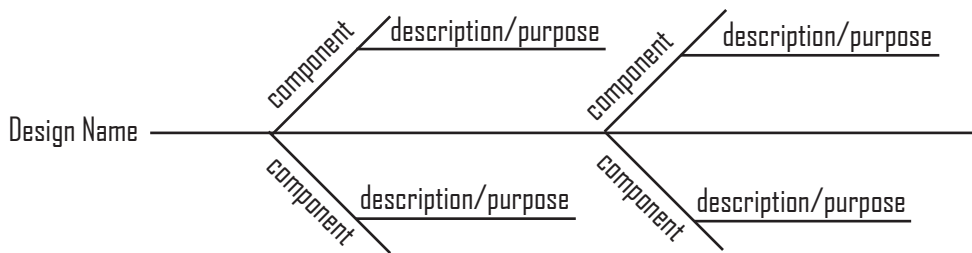

Graphic thinking organizers provide a variety of ways to organize and analyze information.

Notes

See page 14 of source for more information. Following this page is a sample of how the Fishbone graphic organizer can be used in STEM EDA.

Example Use in STEM EDA

Graphic thinking organizers can be used in a variety of ways. In fact, the engineering design process graphic has an iterative flow chart built into it. Refer to the image below and the following page to see how the Fishbone graphic thinking organizer can be used to describe the designs sketched in the Brainstorming section. This example uses a student's design from the Explore Egg Drop module.
