Use this blank programming design process (PDP) template to help you create your program.

**PDP Step 1: Identify the Goal**

In your own words, identify the goal of the program. 

**PDP Step 2: Use the space below to create pseudocode.**

**PDP Step 3: Use a development environment or tool to implement your program.**

**PDP Step 4: Did the program behave as expected?**

If there is anything you need to change, describe the changes you will need to make.

**PDP Step 5: How can you improve the program?**
