

1. Territory: Worldwide

2. Purpose

Through cooperation with Palo Alto Networks, NICERC, and Moonami Learning Solutions, this Foundation course is freely available to all learners effected by the Coronavirus pandemic who are seeking to gain cybersecurity knowledge as well as career exploration in the cybersecurity industry. By working through the 7 course modules, students will learn the fundamentals of Cybersecurity and identify concepts required to recognize and potentially mitigate attacks against enterprise networks as well as mission critical infrastructure. After completing each of the 7 module quizzes with an 80% or higher grade, students will receive a student certificate of completion signed by the CEO and Chairman of Palo Alto Networks.

3. Self-Paced Moodle Course Enrollment Process

- a. To get started, create a new Moodle account at paloaltonetworksacademy.net
- b. After you receive account validation through email, select the course link below, scroll to the bottom of the page and enter the self-enroll password.
- c. The types of activities in this Moodle course include: Pre-Tests, Reading activities, Videos, Lab Activities, Games & Quizzes.
